

CPSC 477/577 Natural Language Processing – Spring 2021

Homework 3

Due 5/7/21, 11:59:59 PM

Instructor: Dragomir Radev

Instructions:

- Please submit a legible PDF for this assignment on Canvas by the due date.
- In total, your assignment should be 750 words long (max 3 pg double spaced). This means your response to each question should be approximately 250 words.
- Points for all three questions will be weighted equally.

Questions:

1. What were the 3-5 topics you found most interesting in this class, and why?
2. Choose a current research problem in NLP, and explain why it is important and why it is hard to solve. Then suggest a new way to solve it. How will you evaluate any progress on it?
3. What additional topics (not covered in the class) would you want to learn about, and why?
